Uncle Mok

Mr Mok showed his skills as a chef when he cooked his dish even without the right ingredients or equipment. His ability to adapt to different situations such as cooking in a modern kitchen with its high-tech equipment and the ingredients on hand displayed his talent and showed us that we need to have passion in whatever we undertake.

Interacting with Mr Mok was a whole new discovery for us. We do not often take the initiative to talk to the elderly because we feel that we need to help them whenever we go to an elderly person. We forget how much they can actually help us with their skills and knowledge.

This opportunity was really beneficial for us. This was an "out-of-the-book" lesson that has taught us more than what we had expected and it is something that we will take with us forever.

It was a wonderful, unforgettable experience to be in Mr Mok's company and all the other elders too.

We will miss this amazing uncle dearly. He brought us lots of laughter and of course, fantastic food.
